

Information about the 16ECEE in Thessaloniki, 2018

It is with great pleasure and honor to announce the organization of the **16th European Conference on Earthquake Engineering, (16ECEE)** by the Hellenic Society of Earthquake Engineering, member of the European Association for Earthquake Engineering (EAE), and the Civil Engineering Department of the Aristotle University of Thessaloniki, which will take place in Thessaloniki, Greece from 18 to 21 June, 2018.

The Conference is a highly-anticipated event, held every four years, and is considered to be the leading activity of the European Association for Earthquake Engineering (EAE), member of the International Association for Earthquake Engineering (IAEE), as well as the baseline and meeting point for the scientific and professional sector at an international level, with more than 1000 delegates from Europe and worldwide.

16ECEE is around a breadth of state-of-the-art scientific topics. In Thessaloniki, earthquake structural and geotechnical engineers, geologists and seismologists from all over the world will find an excellent forum to exchange ideas, share knowledge and discuss the most recent advances in soil dynamics, structural and geotechnical earthquake engineering, up to the boundaries of geology and engineering seismology. Distinguished invited keynote lecturers will present recent and ongoing developments, addressing unresolved issues and projecting ideas for the future. Special sessions, workshops and round table discussions will also be carefully organized on selected topics of particular engineering and societal interest, to broaden the horizons of the earthquake engineering community and to reinforce international cooperation links.

In the process of preparing and promoting the **16th European Conference on Earthquake Engineering (16ECEE)**, it is important to have your support and assistance in informing for the particular event the academic community of your university, teaching staff, research fellows, as well as students, from the relevant departments related to the specific scientific and professional field.

We are more than happy to assist you in this purpose, by providing you with the following material: **web banner, introductory text, promo flyer** and **ad/poster** (in pdf formats). Apart from any direct information dissemination (email), it would be important if you could upload the attached conference material on your website or include the relevant information in your next newsletters. In case you need the material in any different format or specifications, please do not hesitate to contact us.

Remaining at your disposal for any further clarification, we thank you in advance for your support and cooperation.

Additional information regarding the conference can be found on our website www.16ecee.org.

Kyriazis Pitilakis

Professor at Aristotle University of Thessaloniki

Chairman of the 16th European Conference on Earthquake Engineering
